

Figure 1 consists of 12 bar charts, one for each month of the year (January to December). Each chart displays the percentage of total catch for 12 different fish species. The species are: Atlantic croaker, Striped bass, Weakfish, Spot, Blue crab, Rock crab, Atlantic silverside, Atlantic herring, Atlantic menhaden, Atlantic bluefish, Atlantic tomcod, and Atlantic silverside. The y-axis for each chart represents the percentage of total catch, ranging from 0 to 100. The x-axis represents the species. The charts show seasonal variations in catch percentages for each species.
